Grounding for the Metaphysics of Morals is a work of modern philosophy by the rationalist philosopher Immanuel Kant. The first of his extensive writings on moral philosophy, the work attempts to lay out the foundations of ethics, explicating the guiding principles and concepts of moral theory, and asserting that they are equivalent with rational choice.

### **The Metaphysics of Morals Summary | SuperSummary**

"Metaphysics" is the study of pure concepts as they relate to moral or physical experience. People generally presume that moral principles must apply to all rational beings at all places and all times. Moral principles must therefore be based on concepts of reason, as opposed to particularities of culture or personality.
