Fruit Fly Tutorial Index.
In this virtual lab we will cross various fruit flies to see what phenotypes are present in the F1 and F2 generation. Using the data from these crosses, we will make a hypothesis regarding the genotypes of the parental (P) generation and test the hypothesis using a chi square analysis.

Two Virtual Labs to Study Genetic Inheritance in the Fruit Fly

The fruit fly is an excellent organism for genetic studies because it has simple food requirements, occupies little space, is hardy, completes its life cycle in about 12 days at room temperature, produces large numbers of offspring, can be immobilized easily for

FruitFlyGenetics- VirtualLab

The purpose of our fruit fly experiment was to learn about genetics, which is the study of DNA, genes and traits. We also studied mutations, which are the changing of an organism's genes and DNA sequence which makes the organism different than that of its species, and the effects of it on our flies.
