Purpose. Knowledge is recognized as a valuable asset and universities are in search of a new strategy that allows them to build their knowledge and experience. To achieve this goal, it seems essential to find the factors associated with knowledge creation (KC) in universities. There is currently no comprehensive model that delineates the relationships between personal, institutional and support-related factors of KC.

Education and Knowledge Creation | U.S. Cluster Mapping

Knowledge creation is an important factor and remains a source of competitive advantage over knowledge management. Constructivism holds that learners learn actively and construct new knowledge based on their prior knowledge. Therefore, there needs to be a shift in locus of constructing knowledge from the individual to collective construction.

Knowledge Creation in Constructivist Learning

Education means more than acquiring knowledge. It empowers people to develop personally and become politically active. That's not always in the interests of rulers, writes DW's editor-in-chief Ute...
