ISO 17025 sets the bar for high quality
forensic science work, whether
undertaken by the police or outside
contractors. It's followed by labs tasked
with matching DNA, fingerprints, blood,
paint, fibre, and so on, ensuring that the
test procedures and equipment are fair
and valid.

Digital evidence includes data on
computers and mobile devices, including
audio, video, and image files as well as
software and hardware. Digital evidence
can be a part of investigating most
crimes, since material relevant to the
crime may be recorded in digital form.
Methods for securely acquiring, storing
and analyzing digital evidence quickly
and efficiently are critical.
