The Dauphin Island Sea Lab was founded in 1971 by the Alabama legislature to provide marine science programs for many of the state's colleges and universities. Today, 23 member institutions partner with the Dauphin Island Sea Lab to provide studies to undergraduate and graduate students.

Dauphin Island Sea Lab

The Sanford Lab is interested in how marine populations and communities vary in response to both natural oceanographic variation and anthropogenic climate change. Our research seeks to integrate ecology, evolution, and biogeography to understand the processes that shape marine communities: both over large distances along coastlines, and in an era of accelerating climate change.
