Study Guide Nursing Care of Children - zu.edu.jo

In time-out, the child is told to sit on a chair for a predetermined time, usually 1 minute per year of age. Relating time to a behavior is subjective and inappropriate when the child is very young. Time-out can be used with a toddler. Negative behavior should not be reinforced with a positive action.

The principles describe what constitutes safe and effective nursing care, and cover the aspects of behaviour, attitude and approach that underpin good care. Each of the principles was developed by the Royal College of Nursing in partnership with the Department of Health and the Nursing and Midwifery Council.

Principles of nursing practice | Royal College of Nursing

For a child with a visual impairment, to improve communication the nurse should orient the child to the surroundings, allow the child to handle equipment as the procedure is explained, and explain sounds the child may frequently hear.
