Venomous: How Earth's Deadliest Creatures Mastered ...

Compared with other groups of animals, the mammals boast very few venomous members; the Cnidaria, including jellyfishes, anemones, and corals, are an entire phylum — more than nine thousand species — of venomous animals, though if we want to talk sheer numbers, the venomous arthropods, including spiders, bees and wasps, centipedes, and scorpions, undoubtedly reign supreme.

Venomous: How Earth's Deadliest Creatures Mastered ...

From the coasts of Indonesia to the rainforests of Peru, venomous animals are everywhere — and often lurking out of sight. Humans have feared them for centuries, long considering them the assassins and pariahs of the natural world. Now, in *Venomous*, the biologist Christie Wilcox investigates and illuminates the animals of our
